COLORADO INFINITY START SYSTEM

Expansion Ports

Infinity Mounted on Tripod

External Speaker

The Infinity Start System makes an excellent entry level start system for swimming clubs and smaller pools. The system features a highly visible built in strobe light that automatically flashes as the horn sounds, providing fair starts to hearing impaired athletes and a visual indicator for time keepers. A wired microphone is included with the system allowing comunication between the starter and the competitors at the blocks. It has a false start recall feature that enables the starter to signal a false start and immediately alert the competitors.
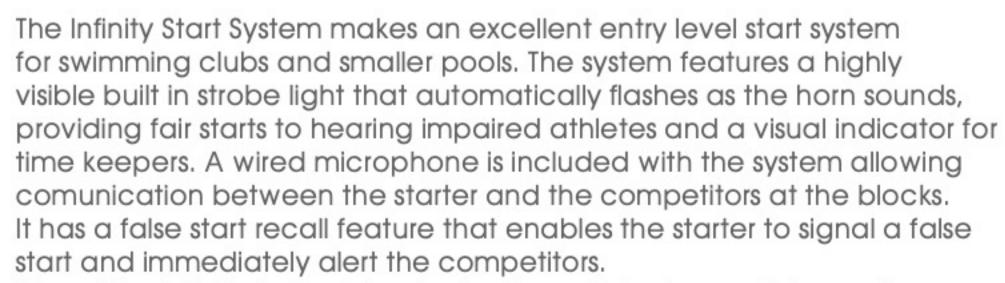

Mount the Infinity to the Tripod using the quick release plate so all can hear and see. The system is lightweight easy to use and portable.

Expansion Options:
A additional 40-watt External Speaker and Strobe Light can be added. This unit can be added to other Colorado Timing Systems including the System 6 Computer Console and the Dolphin Wireless Timing System.
