

AQUEAS AQ-SP01 STARTING PLATFORM

The AQUEAS AQ-SP01 Starting Platform is designed for a wide coping (end wall) where the coping is no higher than 250 mm from the water level. The starting platform is made of heavy duty 316 mirror polished stainless steel 38 mm^ø with a 500 mm x 500 mm non-slip pattern blue fibreglass top. It also features a backstroke bar at the front.

The starting platform is made of heavy duty 316 mirror polished stainless steel 38 mm^ø with a 500 mm x 500 mm non-slip patterned fibreglass top. It features a backstroke bar at the front.

Fixing options:

- (A) Fixed - Fixed using 100 mm dia. leg flanges
- (B) Removable with standard legs - 2 x AQ-PS01 100 mm sockets used on the front legs and cap ends on the rear legs
- (C) Removable with articulated rear legs - 2 x AQ-PS01 100 mm sockets used on the front legs and articulated feet on the rear legs

The (C) Removable is a popular choice as the articulated feet compensate for an uneven surfaces. Removable (B) & (C) blocks can be stored away when not required.

Platforms are supplied with blue tops as standard but can be ordered with white tops by request at time of placing order at no extra cost.

Platforms are supplied without lane numbers, if lane numbers are required this is an option and must be requested at time of placing an order at additional cost. Numbered platforms comply to FINA standards.

Brand: AQUEAS
